### LE TRUPPE RUSSE AL CONFINE CON L'UCRAINA

#### Assessed Control of Terrain in Ukraine and Main Russian Maneuver Axes as of March 19, 2022, 3:00 PM ET

\* Assessed Russian advances are areas where ISW assesses Russian forces have operated in or launched attacks against but do not control.

Note: We have updated our map to show expanded Russian areas of controlled terrain and advances around Chernihiv based on more detailed reporting from the Ukrainian General Staff and other sources. The expanded areas of assessed Russian control in our map of March 19 do not indicate that the Russians have made further gains, only that we have received sufficiently detailed and reliable reporting of previous gains to adjust our map.
